PLANO, Texas--(Business Wire)--  
Clear Packets today announced general availability of its  
FMS-Enterprise Gateway, the first true enterprise class integrated  
solution for virus protection, web security, information protection,  
content filtering and employee internet management.

FMS-Enterprise Gateway is a major advancement in being able to  
precisely identify known harmful programs such as viruses, worms,  
malware, spyware, P2P clients or any other programs right on the wire.  
This technology enables it to kill any known harmful programs on the  
wire before they reach their target and do the damage. Its unique  
stateful URL-domain active tracking technology enables advanced web  
content filtering for network security and employee internet  
management.

FMS-Enterprise Gateway raises the bar to next level in terms of  
high availability (HA), scalability and performance. Its breakthrough  
simplicity and enterprise class high performance makes it the first  
integrated solution offering:

- identification and termination of known viruses on the wire,  
and empowerment of the administrators to create own virus  
filters for any found viruses in less than 1 minute
- advanced web content filtering using URL-domain active  
tracking technology for employee internet management and  
security
- business information and intellectual property protection and  
leakage prevention
- network application control based on user profile
- powerful, fine grained internet and intranet access control
- blockage of unwanted time wasters or unethical websites, even  
blocks partial domains
- real-time view of all network activity and real-time bandwidth  
usage summary for every user
- ultra deep packet inspection and IP/port matching filter based  
IDS/IPS
- pin-point log of all known virus spread attempts, blocked  
website access attempts, business information leakage/theft  
attempts etc.
- ultra compact storage of all internet and intranet activity  
log, 24/7/365, for security auditing and regulatory compliance  
at storage cost about \$1/employee/year
- 24/7 automatic protection against latest and emerging known  
threats

and much more, in one easy to manage box.

FMS-Enterprise Gateway keeps the network fully available even  
during software upgrades through extremely careful software design. As  
a true enterprise class product, it gracefully handles extreme load  
conditions and switches to port bypass hardware HA mechanism in  
catastrophic events to maintain 100% network availability.

About Clear Packets, LLC

Clear Packets, based in Plano, Texas, designs, develops and sells  
integrated business productivity and security solutions, which solve  
many common problems faced by businesses of all sizes everyday. For
